

The Evolution Sequence

B M D N R L G ch F S H T

In this course, we will begin our study of the consonants by looking at them in a sequence known as the Evolution Sequence. Through this arrangement of the consonants, we can imagine a story that begins with the beginning of a person's life and unfold until his or her death. The first twelve lessons will thus unfold a consonant pilgrimage for you. At the end of each consonant essay, you will find a form to practice the sequence as it develops, adding one sound with each lesson so that by the 12th lesson you have a form for the journey from B to T.
